

# Choral forests

Area [Piam](#)

One of the Aquifers under Piam, coral transfers the beautiful melodies.

## Background

The Choral Forests are the most famous of Piam's aquifers — a vast underground lake whose walls and ceilings are covered in living coral illuminated by crystalline growths. The resonant water enhances all sound within the cavern, creating natural harmonies that can turn a whisper into a choir.

Residents include Faun, Coralfolk, singers blessed by [Calli](#), and travelers seeking magical inspiration.

Voice magic attuned to soul-resonance is strongest here.

## Notable Features

Nothing found
